600	450				Metric size	Unusual
600	350				Metric size	Available
600	300				Metric size	Common
550	300				Metric size	Available
500	380				Metric size	Unusual
500	300				Metric size	common
500	250				Metric size	Very Common
500	200				Metric size	Available
460	330				Metric size	Unusual
460	220				Metric size	Available
450	300				Metric size	common
450	250				Metric size	Available
450	220				Metric size	Available
400	380				Metric size	Unusual
400	300				Metric size	Available
400	250				Metric size	common
400	220				Metric size	Available
400	200				Metric size	common
350	300				Metric size	common
350	250				Metric size	Available
350	200				Metric size	Available
320	220				Metric size	Unusual
300	300				Metric size	Unusual
300	250				Metric size	Available
300	200				Metric size	Available
300	180				Metric size	Available
270	180				Metric size	Unusual
270	160				Metric size	Unusual
270	150				Metric size	Available
250	250				Metric size	Available
250	180				Metric size	Unusual
250	150				Metric size	Available
200	200				Metric size	Available

Notes

Not all slate sizes are available from each quarry. Some slates are only available in one standard size.

Imperial sizes are mostly available for repair and heritage work from British and Canadian quarries.

Metric slates are mostly available for new work from Spanish, Brazilian and Chinese quarries.

The Metric sizes for Imperial size slates have been rounded to the nearest 5mm

Slates 9 inches wide were often used for Damp Proof Courses

Some names were used for more than one size of slate.
